Step 1: Determine the aggregate special tax amount required for the purpose of:

(a) paying principal and interest and other periodic costs on notes, bonds and any other indebtedness of CFD No. 07-1, anticipated special tax delinquencies based on the prior delinquency experience, the establishment or replenishment of bond reserve funds or other reserve funds, repayment of funds advanced to pay legal, financial and administrative costs associated with formation of the CFD, credit enhancement and liquidity facility fees and other incidental expenses, the proceeds of which are being used to finance the acquisition, design, construction,

lease, equipping and/or improvement of educational sites and facilities, and costs attributable to refunding of such indebtedness,

(b) paying directly for the acquisition, design, construction, lease, equipping and/or improvement of educational sites and facilities, and

(c) paying the administrative costs associated with determining, calculating, levying and collecting the special tax for CFD No. 07-1.

Step 2: To the extent that current available funds are not sufficient to pay the amounts determined in Step 1, apportion the special tax up to the applicable Assigned Special Tax Rate for each parcel classified as Developed Property.

Step 4: To the extent that current available funds and special taxes to be collected pursuant to Step 2 and Step 3 are not sufficient to pay the amounts determined in Step 1, apportion the difference between the aggregate special tax amount determined pursuant to Step 1 and the amount to be collected pursuant to Step 2 and Step 3 up to the Backup Special Tax Rate on all Developed Property for which the Annual Maximum Special Tax Rate is equal to the Backup Special Tax Rate.

Section 5. Prepayment of the Special Tax

The owner of a parcel classified as Developed Property that is subject to the special tax may prepay the entire obligation by paying the calculated prepayment amount as well as any additional administrative expenses associated with the processing of the prepayment.

Prior to the issuance of bonds, the calculated prepayment amount of a particular parcel is equal to the parcel's Initial Maximum Special Tax Rate divided by 1.20 multiplied by the applicable Prepayment Factor as shown in Table III. Subsequent to the issuance of bonds the calculated prepayment amount of a particular parcel is equal to the parcel's Initial Maximum Special Tax Rate multiplied by the applicable Prepayment Factor as shown in Table III.
